Smoke Test Brief — CR-2026-10-11-008

MyGenie Customer App · Change: "Anonymous coupon validation + two-step silent login + full error messages" · QA status: PASS (iteration_21.json + live browser) · Tester: _____ · Date: _____

What this is about

When a diner reaches the checkout (Review Order) screen, they can now apply a coupon code even before they have logged in. This test checks three things: (1) generic coupons apply instantly with no login, (2) standard coupons trigger a silent background login and then apply, and (3) error messages are clear and specific instead of raw technical text.

What was wrong

The Apply button on the coupon row was greyed out and disabled for any diner who had not completed the login step. If they typed a coupon code and tried to click Apply, nothing happened. They had to first go back, enter their phone, log in, and then try the coupon again — a frustrating extra step for what should be a one-tap discount.

Additionally, when a coupon was invalid, the error message shown was often a raw technical string from the server (e.g. "Minimum order value is Rs300.0" or "Coupon not valid for channel dine_in") rather than a friendly, readable sentence.

What the change does

1. **Anonymous coupon apply** — the Apply button is now active even without login. Generic coupons (available to all diners) validate and apply instantly, no login needed.
2. **Two-step silent login** — if the coupon requires a customer account, the app silently calls the skip-otp service in the background using the phone already typed on screen. The diner never sees a login screen — the coupon just applies.
3. **Friendly error messages** — all 8 coupon error types now show a clear sentence. For example: "Minimum order value not met for this coupon" instead of the raw server string.

> **What must NOT have changed:** Loyalty points, coupon Remove button, order placement payload, name pre-fill, and all other price rows are untouched.

Before you start

You need	Notes
Restaurant **689** (Kunafa Mahal)	App: https://genie-customer-app-1.preview.emergentagent.com/689
Test coupons on r689	STO-GENERIC-10 (generic, 10% off) · STO-STANDARD (standard, 15% off) · STO-GENERIC-MIN (generic, ₹50 flat, min ₹300)
Test customer	Phone **9035133228** (Saurav)

You need	Notes
Cart with items	Add items totalling at least ₹100 (use any available item or inject via localStorage if items are sold out)

The test — 4 steps (~10 minutes)

Step 1 — Generic coupon applies without login

1. Open **https://genie-customer-app-1.preview.emergentagent.com/689**
2. **Do NOT tap Browse Menu** — instead go directly to Review Order (or navigate to `/689/review-order` with a cart already set)
3. Fill in name **"Saurav"** and phone **9035133228** in the Customer Details section (do not submit/login)
4. In the Price Breakdown section, type **STO-GENERIC-10** in the coupon input and tap **Apply**
5. **Expected:**
6. The Apply button is **active** (not greyed) before tapping
7. Toast appears: **"Coupon applied — ₹X off"** (10% of your cart total)
8. Coupon row shows **"STO-GENERIC-10 — ₹X off"** with a Remove button
9. Grand Total is reduced accordingly
10. **No login screen or phone prompt appeared**

> Old behaviour: Apply button was greyed — nothing happened when clicked.

Result: □ PASS □ FAIL — notes: _____

Step 2 — Standard coupon triggers silent login and applies

1. Clear the applied coupon (tap Remove if Step 1 left one applied)
2. Ensure name **"Saurav"** and phone **9035133228** are filled in Customer Details
3. Type **STO-STANDARD** in the coupon input and tap **Apply**
4. **Expected:**
5. The Apply button shows a brief loading indicator (**"..."**)
6. Toast appears: **"Coupon applied — ₹X off"** (15% of cart total)
7. Coupon row shows **"STO-STANDARD — ₹X off"** with Remove
8. **No login screen appeared** — the app handled it silently in the background
9. Loyalty points section activates (because the user is now logged in)

Result: □ PASS □ FAIL — notes: _____

Step 3 — Error message: minimum order not met

1. Remove any applied coupon

2. Ensure cart total is **below ₹300** (e.g. a single ₹199 item)
3. Type **STO-GENERIC-MIN** and tap **Apply**
4. **Expected:** Error text appears below the input: exactly **"Minimum order value not met for this coupon"**

> Old behaviour: showed raw server text "Minimum order value is Rs300.0".

Result: □ PASS □ FAIL — notes: _____

Step 4 — Error message: invalid code

1. Type **ZZZINVALID** (a code that does not exist) and tap **Apply**
2. **Expected:** Error text: **"Invalid coupon code"**

Result: □ PASS □ FAIL — notes: _____

Reporting

- All steps match → reply **"Smoke PASS CR-2026-10-11-008"**
- Anything different → reply **"Smoke FAIL CR-2026-10-11-008 — step N"** with what you saw and a screenshot if possible

Overall: □ PASS □ FAIL Signed: _____ Date: _____
